After the long night of walking, WAGNER will be greeted by a knock at the door. A woman knocks on the door. WAGNER calms himself and answers the door. The woman introduces herself as Emelya and WAGNER says to her it's been a long time and he'd like to catch up with her and says he has someone waiting for him in the back and asks her to take his things. The inner room is dimmed because there's a very long conversation between the two. WAGNER is very excited and cordial, especially since the woman is already approaching his 35 years of life and looks like she's a little young to be WAGNER's mother. He invites her to sit down and joins her. WAGNER is very close and fond of the woman, and he gives her a little kiss before she can say anything. The woman looks uncomfortable and is reluctant to touch WAGNER, but he continues to kiss her. After a few kisses, she says she needs to get going as WAGNER lets go of her. He's very enthusiastic and curious about how long it took her to get to the house. She tells him that she came by as his bus was passing by so he could take care of his things and that she had hoped to see him before too, but she'll have to leave soon. WAG

SUBSCRIBED- Exclusive content, great DLC, Awesome Memes! “We are taking the player through a twisted universe filled with mutant creatures. A long time ago, an unknown cosmic force washed over the earth and mutated the human race. It wasn’t just humans. People grew hair, sharp claws, fangs, wings, eyes, and more. Many of these mutants have lived together peacefully as a single species for generations. They had no idea that one day, an elite group of mutants would rise to power, and rule the planet. After a bloody war, the Cuties’ domination fell. In the ruins of their former home, the mutants split into two competing factions: the loyal Stinks and the evil Skilletts. The Cuties abandoned the planet. New alliances will form, old enmities will be forgotten, and civilizations will rise and fall. Only time will tell.” You are a mutant who can control a completely unique creature called a bunny. As you progress, you’ll be able to unlock new ways to manipulate your bunny and even discover new skills that are beneficial in some situation. There are so many different ways to play this game and we are here to help you through it. After each stage, players will be awarded tokens that can be used to unlock new stages, kill bosses, collect items and craft items. The Steam store page for the game has been updated with screenshots and artwork to accompany the Early Access launch. Stages: Each stage includes at least three different objectives. The first can be completed in any order, and the latter two are typically completed in that order. The objectives are: Collect coins Kill a boss Collect a special item With your bunny, you must make use of the destructible environment. With the right timing and skill, you can trigger special attacks that can lead you to the enemies in the stage. Unfortunately, there are multiple enemies as well as obstacles, so you must also carefully choose your target. Each stage will have at least five boss enemies. Here's my code:

```
import { AppState } from './../AppState'; import * as firebase from 'firebase/app'; import 'firebase/auth'; firebase.auth().onAuthStateChanged((user) => { if (user) { AppState.setAuthUser(user); } else { AppState.setAuthUser(null); } });
```

 The "user" variable gets set to null even if I sign in and sign out. I can't figure out why, especially since I can see the changes to the authentication state in the Google Firebase log. For example: // Sign in firebase.auth().signInWithEmailAndPassword('', 'password123').then((user) => { AppState.setAuthUser(user); }).catch(error => { console.log('ERROR', error); }); The second parameter to the signInWithEmailAndPassword function (the email and password) is part of the authentication state, but it's not being set to anything in my code. I'm sure this is probably something really simple I'm overlooking. A: When you call signInWithEmailAndPassword(), it returns a promise. You're calling setAuthUser() immediately after that promise has resolved, before the user has actually signed in. You should wait for that promise to resolve. Try this:

```
firebase.auth().onAuthStateChanged((user) => { if (user) {
```

What's new:

Sorry to go off on one at this time but I had to share some happy news. I also have been experiencing sudden bouts of nausea and dizziness and was hoping someone could give me some insight on what might be going on. My doctor pulled all the blood samples back and is having the results back within the week. That includes everything on my last visit and a couple of days over the past year. I have to wait for the "test result" before the person has the answer. I want to know what they are so I don't have to wait for weeks for an answer to my symptoms. I know it sounds dumb but I feel like I'm waiting for when it's my turn to give my statement on the college grad equation; "On the plus side is CSU having Fridays off, and on the down side is I don't have a car." The good news is all the blood results from last year are normal and the same as all the other tests done. No strange results. So I don't know what this whole thing is about. Keep your fingers crossed for good news. Now if you will excuse me, I feel sleepy... Full moon party. It's time to re-enact our scene at the homecoming. Maybe you'll get to see me next time. I was shocked to find out that I have a percentage of lymphocytes estimated to be 11%. This number was not included on my last appointment but I can't recall what the percentage was when I was there. Right now, my primary doctor has ordered another blood sample to confirm the other results and a bone marrow biopsy to see if there is a blood condition present. If this lymphocyte percentage is verified, then that is a new low-grade infection. Some of the symptoms I have experienced, is that I'm ill most of the time, some times enough to have to take time off work. I get stiff neck/shoulder pain if my shoulders are pressed against something, and I sweat a lot which I guess is the body trying to warm the area. I was also told last time I went to visit, that I had very low iron levels in my blood. My iron levels have consistently been low over the past 6-7 months; I wonder if this is the cause of the low white blood cell count and the fact that I don't

Merlin is a lonely old man whose existence has become difficult to manage. He recalls events of his life from a long time ago when he used to be a famous magician. But he doesn't remember what happened to him after that. All he can remember is a vague sensation of something strange coming out of his hand and finally taking over him. Somewhere in this game you will discover the truth about his past. But finding out the truth will force you to make sacrifices in the nearest future. You will have to explore five different worlds, each of them lead by an old man who will give you clues to the events of Merlin's life. Story: The game is a very simple story. It revolves around a strange old man named Merlin who cannot remember his past. All he remembers is his hand and how it felt when it was being pushed by some unknown force. During the game you will explore five different worlds and each one of them will tell you a part of Merlin's life. As you will be playing the game in first person view, you will see everything that happens to Merlin in a first person style. Game Screenshots Key Features: The Ending is Truly Unique – All of the endings will be unique in some way. There are no replays, just different endings, just like the real life! Excellent Voice Acting – The voice acting is great. The voice actors do a great job of creating emotions in the characters of the game. The Music – There is a wonderful soundtrack to complement the story that you are playing. The Ending The good endings will involve you finding the crown piece and completing the game with a new perspective. These endings are more likely to be found in the fourth or fifth chapter. The Bad Endings These endings will not allow you to reset and replay all the worlds again. These endings are harsher and play out more like a movie cutscene, and you will lose everything you've done in these worlds.
