The real pros out there who are serious about photography are bound to leave Lightroom, so I would be interested in hearing from those of you who are using Photoshop as a one-stop-shop for image management and come back to Lightroom from time to time. I am sure that it is just due to unfamiliarity with Photoshop. I am still grateful for the number of shared images that I managed to download with the Cyrillic character set in place. Adobe provides customers with pricing options that depend on the plan they purchased. Photographers, and the professionals who use them, need more pricing options than Lightroom 5 provides. For now, it is a little like every car in relation to fuel types we provide as options. Let us instead focus on one in particular: When is updating to new versions of software most beneficial? Be it the fifth or the sixth, or even the tenth one, it is all the same. At the heart of it, the cycle occurs when a new version provides new features. Given that Lightroom is a perfectly capable and competent choice already, I don't think Lightroom 5 would have done much for my customers. What it could have done is to provide better overall software performance so as to be fit for a wider audience. The new user interface is a good first step in that direction - at least according to my customers. After all, Photoshop is also a good choice, is it not? Fortunately, Adobe has given everyone a free one-year trial of Creative Cloud subscription – out of the box.

With the help from Adobe, CUNY Research Foundation's Data Visualization Research Group , who have over 30 years experience in teaching and curriculum development, and academics from Data Visualization , we have created the Data Visualization for Teachers Guidesto help instructors and educators navigate the world of Data Visualization . They represent over 30 years of experience in curriculum development, course design and pedagogy, and were instrumental in the transition of the Data Visualization Center at NYU's Vera Russell institute to a new home for teaching, research and community development at CUNY Research Foundation, launched in October 2019. CUNY Teacher Curriculum Planet is a web site designed to help teachers in the public school system make curricular changes by exploring CUNY's research and collecting curriculum resources based on areas of focus. The site's resource pages contain a variety of lesson plans, examples of how to teach different subjects, and developmentally appropriate curricular materials. These resources can be adapted to help K-12 teachers both in traditional learning environments (such as NYC's public school system) and high-quality charter schools, as well as K-12 teachers working in alternative settings or in the home. The site also contains lesson plans for teachers who might want to bring more of a digital component into their day. The curriculum for each subject is organized around the specific learning objective. They're mostly tutorial level, to introduce a new topic, but some are introductions, so teachers can get an overview of the subject. A number of the fits systems, occupational programs, and CUNY university coursework are also collected in this site.
